At **Rosamund Felsen Gallery** adjacent to CB1, dyed and hand-sewn felt pieces by **Nancy Jackson** incorporate her usual detailed drawings but rendered as small lenticular discs. One represents images of women, with eyes that open and close, embedded in a design that references cosmology. Others are abstract symbology. It is a wonderful show by an eccentric but always interesting artist. Also on view are the unexpected pleasures of paintings by veteran Les Billar. On view through August 8.
